Cologne, Germany, 18 November 2025

At the European Rotors Show, REISER Simulation and Training GmbH announced it will join forces with Leonardo to codevelop a new-generation AW139 helicopter FTD (Flight Training Device) Level 3 simulator to meet specific civil-market requirements for high-fidelity, cost-effective solutions.

This collaboration allows the partners to offer one more opportunity for operators seeking an exceptional training experience at a fraction of the cost of other simulation levels and standards

when not explicitly required. With this initiative, REISER is also responding to specific needs set by HeliOperations of UK, as an AW139 operator, by signing a Memorandum of Understanding (MoU) to deliver one of these systems.

These simulators will integrate Leonardo's OEM-grade simulation fidelity with REISER's cutting-edge technology. Tailored for civil operators managing small to mid-sized fleets, this innovative solution dramatically lowers the entry barrier to simulation-based training while preserving a high level of realism. It enables operators to establish in-house training capabilities, improve flight safety, and boost operational readiness — all with minimal upfront investment.

This partnership reflects a shared commitment to driving innovation, expanding accessibility, and elevating safety standards in rotorcraft training.

"For REISER, this partnership and the development of another helicopter training device together with Leonardo marks an important milestone in the collaboration and extends the product portfolio by one of the most relevant helicopter types in the world," says REISER CEO Dr. Johannes Hain.

About Reiser Simulation and Training GmbH:

REISER Simulation and Training GmbH has been leading the revolution in aviation training for over three decades. With a distinctive German engineering touch, REISER has been delivering innovations globally, enhancing the efficiency and safety of flight personnel training worldwide. Our simulators and training devices minimize the ecological footprint associated with traditional training methods but also conserve vital resources. REISER's commitment to sustainability is evident in every aspect of our operations. Learn more at **reiser-st.com**.
